data and information off campus or on an external network, including the use of portable and mobile equipment. Its aim is to ensure that the University complies with data protection laws and other legal obligations and that University data is protected from unauthorised access, dissemination, alteration or deletion.

- 1.1 The University recognises the need for its staff to be able to disseminate, store and transport the information they require in order to carry out their work.
- 1.2 The University also recognises that the information it manages must be appropriately secured in order to maintain its reputation for trustworthiness, to protect against damage and/or distress being caused to those that entrust us with their data, to protect the institution from the consequences of breaches of confidentiality including possible legal and financial consequences, to avoid failures of integrity or interruption to the availability of that information and to comply with the law and any applicable contractual agreements.
- 1.3 This policy applies topadriabberhation for which the University has a legal, contractual nputers, or other forms of communication (e.g., aging).

ny other person or organisation having access to

corts the existing Data Protection Policy, ssification Policy, Records Management Policy, esponse Policy, Regulations for the Use of the ities and Systems and guidance on the handling h PCIDSS compliance requirements.

2. Roles & Responsibilities

Heads of Schools, Functions and Departments	To ensure that their staff are made aware of this policy and that breaches of it are dealt with appropriately.		
Line Managers	To ensure that their staff are aware of the Policy, the Regulations on the Use of IT Facilities, and any other Information Security Policies relevant to their work.		
	To ensure that staff and other people with access to personal data and sensitive Information undertake the Information Security training prior to being given access to University data and systems.		
	To ensure that the business processes and practices in their areas comply with the Information Security Policies and other obligations concerning confidentiality.		
Information Asset Owners, Stewards and Custodians	To ensure that an appropriate security classification is applied to the Information they are responsible for, and that encryption of high-risk data and sensitive information is applied where required.		
	To ensure that the business rules covering access rights to the service are defined and maintained, and that they are compatible with the security classification of the underlying information.		
	To ensure that the information security risks for the service are identified, assessed and addressed prior to implementation, and reviewed at regular intervals thereafter.		
	To ensure that information assets are effectively managed in accordance with the data protection principles and Data Protection Policy. To assist with any Information Security Incident as part of the Information Security Incident Response procedures.		
University staff	To assess the need for encryption, based on requirements set out in this policy and apply appropriate security measures as needed.		
	To comply with the Regulations on the Use of Digital facilities, including payment device systems.		
	To complete all required training and follow related policies and guidance.		

To report any breaches or suspected breaches of Information Security in accordance with the Information Security Incident Response Policy.
To inform DTS of any potential threats to Information Security, including ecommerce or payment systems.

3. Consequences of Non-Compliance

3.1 Failure to comply with this policy may result in the University revoking your access to the University's systems, whether through a device or otherwise. It may also result in disciplinary action being taken against members of staff up to and including dismissal. In the case of breach of this policy by a contractor, worker or volunteer, it may lead to the termination of the engagement. This will apply whether the breach occurs during or outside normal working hours and whether the breach takes place at your normal place of work.

4. Requirements and Key Principles

The following key principles underpin this Policy.

- 4.1 If processing personal data on external networks or devices staff must first consider whether anonymising the information to obscure the identity of the individuals concerned would be possible. Further guidance on anonymisation can be found at Information Commissioner's Office Anonymisation guidance.
- 4.2 University managed IT services are appropriately secured and backed up so use these wherever available. The University Virtual Private Network (VPN) must be used to access some systems when working off-site. Connect to the VPN regularly when working off-site even when not accessing systems that require VPN; this enables important security updates to run.
- 4.3 If high-risk or sensitive information is to be processed off campus or on an external network, then it must be stored and transmitted in an encrypted form. This includes the encryption of files sent by email, data in transit held on portable hard drives, and in the case of websites or e-commerce, the use of encrypted transmission protocols such as SSL. There are exceptions where access or transmission of high risk or sensitive

ensure accessibility of data when required. Seek advice from DTS if you need to check recommended encryption tools.

Laptops, smartphones, tablets - Personally owned

- 4.10 All staff using personally owned devices must comply with the requirements of the Bring your own device (BYOD) Policy.
- 4.11 Staff should wherever possible avoid the storing of high risk or sensitive information on personally owned devices. Where this is unavoidable, staff must encrypt the device using IT approved encryption standards. Staff will be wholly responsible for the safe management of their encryption keys, passwords and any other means of access; IT will be unable to recover lost passwords for personally owned devices and staff should be aware that loss of passwords or encryption keys could render data inaccessible. For this reason, you must ensure that copies of the data are maintained on University systems to protect against risks posed by data becoming inaccessible.

Other portable devices/removable media

- 4.12 Portable devices such as USB sticks, portable hard drives, and recording devices are at higher risk of loss or theft so additional care must be taken to protect the physical security of these devices.
- 4.13 Wherever available, device encryption should be used ensuring that encryption keys, passwords and any other means of access are stored securely on University networks.
- 4.14 Alternatively, encrypt files that will be stored on the device.
- 4.15 Encryption is a requirement for any portable devices/removable media that will be used to store or transfer high risk or sensitive information.

Email and data sharing tools

- 4.16 Avoid sending high risk or sensitive information externally by email or using email to store such information. If you must use email to send this sort of information externally, encrypt it prior to sending.
- 4.17 If you are sending unencrypted high risk or sensitive information to another , to include any accounts issued by the University, take extra iorm16.6 (or6

- Discussion papers and options relating to proposed changes to high profile University strategies, policies and procedures, such as the University's undergraduate admissions policy, before the changes are announced.
- Security arrangements for high profile or vulnerable visitors, students, events or buildings while the arrangements are still relevant.
- Information that would attract legal professional privilege.

7. Related policies, procedures, guidelines or regulations

Key related policies and rules:

- Information Security Policy
- Data Protection Policy.
- Classification Policy
- Regulations for the Use of the University of Reading's IT Facilities and Systems
- Related Information Security Policies listed at: http://www.reading.ac.uk/internal/imps/policiesdocs/imps-policies.aspx

UNRESTRICTED

Overall responsibility for this Policy lies with the University Senior Information Risk Owner (SIRO)

8. Review

This Policy shall be reviewed at regular intervals and documented within the version history. Reviews will take place as a minimum at the documented frequency and in the event of any of the below:

- Significant change in University operations
- Significant change in legislation, regulatory requirements, industry guidance or similar
- In the event of a compromise of data protection or security where the content or compliance with this policy is identified as an aggravating or mitigating factor
- Any other identified requirement necessitating substantive changes ahead of scheduled review

9. GLOSSARY

Data Protection Laws

UNRESTRICTED

- Volunteers, interns and those undertaking placements or work experience.
- Contractors engaged by the University.
- Students working for and/or on behalf of the University, including Postgraduate Research students.
- Those with University accounts by virtue of a visiting or courtesy title conferred by the University.
- Any other individual who is working on behalf of the University if they are processing University data or information.

High Risk Data

means that defined in Section 5 of this policy.

Processing

means any operation on data, including organisation, adaptation and alteration; retrieval, consultation or use; disclosure, transmission, dissemination and otherwise making available; or alignment, combination, blocking, erasure and destruction. Processing includes the sending of information via email and other mechanisms such as Instant Messaging and Social Media.

Sensitive information

means that defined in Section 5 of this policy.

Personal data

means any information relating to an identified or identifiable natural person ('data subject'); an identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.

External network

is either provided by a third party (for example an ISP or mobile provider) or is part of the University's guest network provision (including eduroam). This covers any use of mobile devices when processing University data.

Encryption

the process of encoding data, information or messages in a way that unauthorised persons cannot read it but those that authorised (hold the key or password) can.
