

UNIVERSITY OF READING RESEARCH AND INNOVATION STRATEGY

Knowledge is key to changing the way we understand and interpret the world around us. Driving the

What we will do to build individual and collective research leadership:

- i. Recruit, support

- ii. Create opportunities to achieve critical mass for specific challenges of a size and scale that require cross disciplinary working through clusters of researchers and ~~also~~ research themes.
- iii. Cross traditional professional and disciplinary boundaries, ~~to~~ design and reproduce research with academic and non-academic partners, and to create practical value, both within and outside the UK.
- iv. Use our facilities, such as the ~~The~~ Times Valley Science Park and the University Museums and Special Collections, to build new partnerships.

4) Conduct research ethically, and with integrity and transparency

A commitment to open research, and robust processes to govern and review research ~~and~~ integrity and ethics are core to our values, particularly in light of social and technological change. Our open research policy sets out how we will support early discovery of the design, planning, ~~methods~~ results of our research and how we foster a c

How will we monitor progress?

We will monitor overall progress with the strategy against a number of ~~high~~ indicators and against a set of indicators for each objective. We will measure progress at the institutional and research division level.

Professor Parveen Yaqoob, ~~Pro~~Vice Chancellor for Research and Innovation

Professor Dominik Zaum, ~~Pro~~Vice Chancellor for Research and Innovation
